

Emerald Edge

INDUSTRIAL CLEANER & DEGREASER

PRODUCT PROFILE

Emerald Edge is an aqueous based, non-toxic, non-hazardous, biodegradable all-purpose industrial cleaner and degreaser concentrate. It contains no corrosives, abrasives, butyls, bleach or ammonia, and has no irritating fumes or pungent odors. The result of several years of research, Emerald Edge effectively dissolves and lifts tough oil grease and dirt from all water washable surfaces. It is uniquely designed for easy rinsing and fast drying using minimal water, leaving an extremely clean and bright finish, free of oily films or white residues.

To the many who have considered purchasing “green” alternative cleaners, yet reluctant due to the typical inferior performance and/or high price, Emerald Edge offers a welcomed change. Utilizing the most recent advancements in chemistry, Emerald Edge delivers the heavy-duty performance of caustic, butyl or citrus cleaners, yet has a mild pH, mild scent, no butyls, no VOC’s, no citrus odors and is sensibly priced. Safe to use, handle and store, Emerald Edge is exempt from OSHA and EPA requirements for handling hazardous materials. Additionally, Emerald Edge is so environmentally friendly that it’s harmless to microorganisms used for soil remediation and wastewater treatment.

Emerald Edge attracts oil and dirt like a strong magnet, leaving surfaces “squeaky” clean and shiny after rinsing or wiping. This benefit is particularly important when cleaning floors that are notoriously slippery or preparing metal surfaces for painting, applying adhesives or assembly.

A multi-surface cleaner, Emerald Edge is perfect for washing cars and trucks or cleaning floors, carpet, equipment, machinery, vinyl, tile, fiberglass, etc. In proper dilution will not harm automotive paints, pH sensitive metals or flooring materials, waxes or machine internals. It is applied using mops, auto floor scrubbers, high pressure washers, chemical inductors/ proportioners, and spray bottles. Emerald Edge is also available in a super concentrate (Emerald Edge II) and in a special formulation designed to meet the needs of auto repair facilities (Emerald Edge Automotive).

SPECIAL FEATURES:

- **High Performance and Value. Works better and costs less than other “green” alternative cleaners**
- **Rinse or wipe dry. Delivers residue free finish, ready for paint, adhesives, or assembly**
- **Non-toxic, non-hazardous, non-flammable, and 100% biodegradable**
- **No VOC’s/fumes or pungent citrus odor**
- **Mild pH. Safe to handle, safe for use with all equipment, and harmless to the environment**
- **Reduces slippery floor conditions immediately**
- **Harmless to microorganisms used in wastewater treatment plants**
- **Non-abrasive or corrosive, safe for use on all water washable surfaces**
- **Economically priced, concentrated**

TYPICAL USES:

- **Cleaning equipment, tools, machinery, metal parts**
- **Cleaning floors, walls, tile, concrete**
- **Cleaning autos, trucks, forklifts, transport vehicles**
- **Cleaning stainless steel, chrome, aluminum**
- **Cleaning upholstery, vinyl, carpet, fabrics**
