

Emerald Edge *AUTOMOTIVE*

ALL-PURPOSE CLEANER & DEGREASER

PRODUCT PROFILE

Emerald Edge Automotive is an aqueous based, non-toxic, non-hazardous, biodegradable all-purpose cleaner and degreaser concentrate. The result of several years of research, Emerald Edge Automotive effectively dissolves and lifts oil grease and dirt from all water washable materials, leaving an extremely clean and residue free finish after rinsing or wiping with towels, particularly important when cleaning notoriously slippery floors or preparing surfaces for painting or applying adhesives. Excellent for use in spray bottles for cleaning walls, tools, counters, equipment, whitewall tires, undercarriages, carpet, upholstery and preparing metal parts for application of gasket adhesives.

To the many who have considered purchasing “green” alternative cleaners, yet reluctant due to the typical inferior performance and/or high price, Emerald Edge Automotive offers a welcomed change. Utilizing the most recent advancements in chemistry, Emerald Edge Automotive delivers the heavy-duty performance of caustic, butyl or citrus cleaners, yet has a mild pH, mild scent, no butyls, no VOC’s, no citrus odors and is sensibly priced. Safe to use, handle and store, Emerald Edge Automotive is ideal for use indoors and exempt from OSHA and EPA requirements for handling hazardous materials. Also, Emerald Edge Automotive is so environmentally friendly that it’s harmless to microorganisms used for soil remediation and wastewater treatment.

Emerald Edge Automotive is intended for use on all type surfaces related to the automotive industry, from cleaning pH sensitive rubberized floors to washing metal parts in soak vats and ultrasonic machines. Apply using mops, high-pressure washers, spray bottles, or floor scrubber machines. Non-corrosive and mild, Emerald Edge Automotive is safe to handle and will not harm pump and machine internals.

SPECIAL FEATURES:

- **High performance and value. Works better and costs less than other green cleaners**
- **Reduces slipping hazards immediately**
- **Mild pH. Easy on the skin and OK to use on pH sensitive flooring materials in any dilution**
- **Non-toxic, non-hazardous, no fumes or citrus odor and 100% biodegradable**
- **Non-corrosive to scrubber machine internals. No white powder build-up in filters.**
- **Safe for use on all water washable surfaces**
- **Harmless to microbes in Spill Treatment Fluid and water treatment facilities**
- **Economically priced. Concentrated**

TYPICAL USES:

- **Cleaning pH sensitive flooring materials, painted/ sealed concrete, tile**
- **Cleaning metal parts, tools, equipment**
- **Cleaning cars, trucks, buses, transport vehicles**
- **Cleaning upholstery, carpets, vinyl, fabrics**
- **Cleaning chrome, aluminum wheels**
- **Cleaning walls, countertops**
