Institutional

Emerald Edge Ultra is a multi-purpose water based disinfectant cleaner concentrate. Active ingredients added to the concentrate are on the EPA list of registered disinfectants and meet the criteria for use against SARS-CoV-2 (corona virus), lab tested and certified to be effective within one minute. Effectively dissolves, lifts and removes oils, grease, dirt and grime from all water washable surfaces. It is perfect for cleaning kitchens, bathrooms, offices and anywhere germs and bacteria exist.

Municipal

As a concentrate, it can be diluted with water and suitable for cleaning a wide variety of surfaces including countertops, sinks, faucets, floors and doors. Suggested uses include cleaning and disinfecting porcelain, stainless steel, plastic, vinyl, and most metals. The solution is non-staining and will not harm gaskets, seals, or internals of dispensing equipment.

Industrial

The result of several years of research, Emerald Edge Multi-Purpose Cleaner effectively dissolves and lifts tough oil, grease and dirt from all water washable surfaces. It provides fast cleaning action for easy rinsing and drying using water, compressed air or wiping with towels leaving an extremely clean and bright surface free of oily or powdery residues.

Manufacturing

Emerald Edge Ultra is non-hazardous and non-corrosive. It contains no abrasives, butyls or ammonia and has no irritating fumes or pungent odors. Powerful surfactants attract oil and dirt like a strong magnet, releasing them from the surface and making rinsing or wiping quick and easy. As a result, surfaces dry clean and free of harmful or messy residues. It can be applied with spray bottles, pump-up sprayers or can be used for mopping.

Special Features

- Kills SRS-CoV-2 viruses and harmful bacteria
- Non-hazardous, non-corrosive
- Mild pH, safe to handle and store, 100% biodegradable
- Leaves no harmful or oily residues
- No VOC's/fumes or pungent citrus odor
- Non-abrasive, safe for use on all water washable surfaces
- Concentrated for greater economy
